Nowadays more and more people care about the exploitation (开采) of the natural resources, such as oil. Though there're many kinds of resources, with the fast increase of population and the appearance of many more factories, the more we use, the fewer there will be left for the future. Oil is getting less and less year after year. Though it may be incredible, it's said that oil can last for only 50 years. Natural gas perhaps will last about 38 years.

Oil can be used in many ways and it's difficult to imagine what the modern world will be like without oil. But oil isn't easy to find and get out of the earth. Men must study the rocks. When they think the rocks in a certain place may have oil, a metal tower is built. A machine in the tower cuts a hole down into the ground. At the same time, a steel pipe is pushed down to stop the sides from falling in and to keep out

water. At last if the men are right, usually the oil rushes up the sides with great force by the pressure of the gas in the top of the rock, and it rushes high into the air. If the oil catches a light, there will be a terrible fire. So a kind of cover is fixed on the top of the pipe, and the oil can run out through taps.

If we make a well near the middle of the oil field, we can also get gas. Such gas is sent through pipes to towns far away and used in houses and factories like coal gas.

Today oil is under pressure as never before. The price of oil keeps rising all the time. In many countries, the governments encourage people to save oil as much as possible.

56. The underline word “**incredible**” (in Paragraph 1) most probably means

“_____”.

B. Oil is very important in the modern world.

59. According to the passage, the right picture to show the tendency (趋势) to the amount of oil on the earth is _____.

第三节 书面表达（共 1 题，满分 15 分）

Doing your bit for an energy-saving society

Recently, there has been an activity of “Doing your bit for an energy-saving society” in our school. Our schoolmates are highly concerned about the increasing lack of energy and provide their own suggestions.

Some students suggest that we shouldn't waste any food or paper, though they appear very easy to get. Meanwhile, some other students think it advisable to refuse to use disposable chopsticks and plastic bags. Besides, it is also strongly recommended that those used textbooks as well as reference books, which are still in good condition, not be thrown but recycled. And we must remember not to waste the water or electricity.

Actually, there are still quite a lot that we can easily do in our daily life. For example, We can try to take buses or ride bicycles instead of driving cars and turn off the lights when we leave our classroom, etc. All of these will definitely help to build an energy-saving society.
